Vandit Shastri

Machine Learning Engineer
Ahmedabad, Gujarat, India

Summary

At the intersection of modern software engineering and intelligent automation, I build AI-driven solutions designed for scale. As a Computer Science graduate focused on Artificial Intelligence and Machine Learning, my passion lies in developing intelligent systems that create tangible real-world value. Whether architecting specialized conversational agents, crafting high-performance Python pipelines, or exploring the frontiers of Generative AI, I am driven by technical rigor and continuous iteration. I am constantly seeking opportunities to collaborate on ambitious projects that push the boundaries of modern Machine Learning and Python engineering.

Experience

Rootle
1 year 2 months

Machine Learning Engineer
May 2026 - Present (6 months)
Ahmedabad

Machine Learning Intern
September 2025 - May 2026 (9 months)
Ahmedabad

Actowiz Solutions
Python Developer
January 2025 - September 2025 (9 months)
Ahmedabad, Gujarat, India

Education

LJ University
Bachelor of Technology - BTech, Computer Science · (September 2022 - April 2026)
